## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q1

Attempt : 2

Total Mark : 10

Marks Obtained : 10

### Section 1 : Coding

#### 1. Problem Statement

Sabrina is working on a project that involves analyzing a set of numbers. In her exploration, she encounters scenarios where extracting even numbers and finding their sum is essential.

Create a program that calculates the sum of even numbers from a given array of integers using a lambda expression.

#### ***Input Format***

The first line of input consists of an integer N, representing the size of the array.

The second line consists of N space-separated integers, representing the elements of the array.

#### ***Output Format***

The output prints the sum of the even integers from the array.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 3

29 37 45

Output: 0

### **Answer**

// You are using Java

```
import java.util.*;
```

```
import java.util.stream.*;
```

```
class Main{
    public static void main(String[] args){
        Scanner myobj = new Scanner(System.in);
        int N = myobj.nextInt();
        int[] arr = new int[N];
        for(int i=0; i<N; i++){
            arr[i] = myobj.nextInt();
        }
        int sum = Arrays.stream(arr)
            .filter(n -> n%2==0)
            .sum();
        System.out.print(sum);
    }
}
```

**Status :** Correct

**Marks :** 10/10
